Index to ASME Papers and Publications Volume 102, 1980

This and the following pages will serve as a guide to the current publications of the ASME.

PUBLICATIONS ISSUED IN 1980

Books and Reports

Emerging Technologies In Aerospace Structures Design, Structural Dynamics And Materials
A Brief History Of The Applied Mechanics Division of ASME
Computational Methods For Offshore Structures-AMD Vol. 37
Damping Applications For Vibration Control-AMD Vol. 38
Mechanics Of Superconducting Structures-AMD Vol. 41
Solid Contact And Lubrication-AMD Vol. 39
Solid Earth Geophysics And Geotechnology-AMD Vol. 42
The General Problem of Rolling Contact-AMD Vol. 40
1980 Advances In Bioengineering
Advances In Computer Technology-1980
Vol. I: Industry; Energy; Robots and Manipulators; Mini and Micro; Software Application; and Design
Vol. II: Microprocessors; Automotive; Development; Systems; Data Base; Finite Elements; Graphics; Education; Manufacturing; Management; Language; Standards; Personal Computing
Proceedings Of The 1980 Joint Automatic Control Conference
20th Anniversary Of Fluids Symposium
International Conference On Medical Devices And Sports Equipment
Reliability, Stress Analysis And Failure Prevention Methods In Mechanical Design
Basic Mechanisms In Two-Phase Flow And Heat Transfer
Measurement Methods In Rotating Components Of Turbomachinery
1980 Cavitation And Polyphase Flow Forum
Performance Prediction of Centrifugal Pumps And Compressors
Polyphase Flow And Transport Technology
Small-Hydro-Power Fluid Machinery
Vortex Flows
Mechanical Engineers In America Born Prior To 1861: A Biographical Dictionary
Compact Heat Exchangers-HTD Vol. 10
Cryogenic Processes And Equipment In Energy Systems
Experimental And Analytical Modeling Of LWR Safety Experiments-HTD Vol. 7
Heat Transfer In Nuclear Waste Disposal-HTD Vol. 11
Heat Transfer In Ocean Thermal Energy Conversion (OTEC) Systems-HTD Vol. 12
Momentum And Heat Transfer Processes In Recirculating Flows-HTD Vol. 13
Natural Convection In Enclosures-HTD Vol. 8
Scaling In Two Phase Flow-HTD Vol. 14
Bearing Design-Historical Aspects, Present Technology, And Future Problems
Metal Working Lubrication
Surface Roughness Effects In Hydrodynamic & Mixed Lubrication
Wear Control Handbook
Advances In Materials Technology In The Americas-1980
Evaluation Of Materials In Process Equipment After Long Term Service In The Petroleum Industry-MPC-12
Fracture Toughness Of Wrought And Cast Steels-MPC-13
Material-Environment Interactions In Structural And Pressure Containment Devices-MPC-15
Unit And Bulk Materials Handling
Use Of Computer In Managing Material Property Data-MPC-14
Ocean Engineering For OTEC-OED-Vol. 9
Enhanced Recovery And Rotating Equipment-A Workbook For Petroleum Engineers
Peaking Power Generation
Composites In Pressure Vessels And Piping-PVP-42
Criteria For Nuclear Safety Related Piping And Component Support Snubbers-PVP-45
Effects Of Piping Restraints On Piping Integrity-PVP-40
Explosive Welding, Forming, Plugging And Compaction-PVP-44
Flow-Induced Vibration Of Power Plant Components-PVP-41
Recent Advances In Lifeline Earthquake Engineering In Japan-PVP-43
Computer Applications In Manufacturing Systems-PED-Vol. 2
Towards The Factory Of The Future-PED-Vol. 1
Highway Collision Reconstruction
Proceedings Of the 1980 National Waste Processing Conference: Resource Recovery Today And Tomorrow
Symposium On Cotton Dust: Sampling, Monitoring And Control
Railway Mechanical Engineering: A Century of Progress-Car And Locomotive Design

HOW TO FIND PAPERS PRESENTED AT 1980 ASME MEETINGS

The technical programs of the meetings of the Society and of its Professional Division have been published in MECHANICAL ENGINEERING and may be located by consulting the index on page SR-37. Many of these papers will be published in MECHANICAL ENGINEERING or the *Transactions* and may be located by reference to the indexes of these publications. A free, up-to-date edition of the ASME Technical Papers Catalog is available on request. Xerox copies of out-of-print technical papers may be purchased from the Engineering Societies Library, 345 E. 47th St., New York, NY 10017. Phone (212) 644-7611.

Special Services

In order to expedite European orders for the ASME Boiler and Pressure Vessel Code and related titles, special arrangements have been made with the British Standards Institution, (T.H.E.) Maylands Avenue, Hemel Hempstead, Herts HP2 4SQ, England, to stock and sell these titles.

For the convenience of our customers on the West Coast, special arrangements have been made with Global Engineering Documentation Services, Inc., 3301 W. MacArthur Blvd., Santa Ana, CA 92704, to stock and sell Codes and Standards.

Complete sets of all Codes and Standards are available for sale on microfilm from Information Handling Services, 15 Inverness Way East, Englewood, CO 80150.

Select out-of-print symposia and proceedings and ASME journals may be obtained on microfilm or in xerographic form. Contact Xerox University Microfilms, Books and Collections, 333 North Zeeb Road, Ann Arbor, MI 48106.

CURRENTLY AVAILABLE ASME PUBLICATIONS

ASME members are usually eligible for a 50% discount on special publications and a 20% discount on Codes and Standards (exceptions are indicated). In all cases, L before a price indicates the list price of the volume, and M indicates member price. All books may be ordered from the ASME Order Department, 345 E. 47th St., New York, NY 10017. Phone (212) 644-7716.

Piping

B31 Interpretations: Code for Pressure Piping, All current cases, Book No. M00033, L-$13.00, M-$10.40. Three Year Subscription Service, L-$18.00, M-$14.40

Sets forth the conditions under which new materials may be used, the Committee's interpretations of code rules as they apply to specific construction problems of code users, and special provisions to cover conditions encountered in nuclear installations. Individual Cases (Book No. M00034) are available at $1.50, ASME members $1.20. Please specify individual Case number.

B31 Guide, Corrosion Control for ANSI B31.1 Power Piping Systems, Book No. A00089, L-$3.00, M-$2.40

ANSI/ASME B31.1—1980 Edition, Power Piping. The Code prescribes minimum requirements for the design, materials, fabrication, erection, test and inspection of power and auxiliary service piping systems for electric generation stations; industrial and institutional plants; central and district heating plants and district heating systems. Contains basic reference data and specific engineering formulas deemed necessary for safe design and construction in order to obtain uniform interpretation of principle. Includes: (1) material specifications and components standards which have been accepted for Code usage; (2) the designation of proper dimensional standards for the elements comprising piping systems; (3) requirements for the design of component parts and assembled units, including necessary pipe supporting elements; (4) requirements for the evaluation and limitation of stresses, reactions, and movements associated with pressure, temperature, and external forces; (5) requirements for the fabrication, assembly, and erection of piping systems; (6) requirements for testing and inspecting of elements before assembly or erection and of the completed systems after erection. Published in loose-leaf format only, your subscription to Power Piping will include all Addenda issued up to the publication of the 1983 Edition. Fall 1980 Bk. No. AX5880 L-$75.00, M-$60.00

B31.8-1975 Gas Transmission and Distribution Piping Systems, Book No. A00045, L-$15.00, M-$12.00

ASME Guide For Gas Transmission and Distribution Piping Systems—1980 Completely revised and updated incorporating over 200 changes, this 500 page guide plus addenda recommends acceptable methods to enable the operator to comply with the Minimum Federal Safety Standards. Based on sound engineering principles, recommendations are particularly relevant in light of escalated pipeline construction. The latest Government rulings are included. Contains instructive information on design of uncased piping systems, plastic piping, corrosion protection, leakage control for methane and liquid petroleum piping systems. Published in loose-leaf format on a three year subscription basis with addenda issued up to the publication of the 1983 Edition. Bk. No. AX3080 L$125.00, M-$100.00

ASME CODES

Performance Test Codes

Test methods prescribed in the PTC's enable users to obtain accurate information on adaptability of equipment, best methods of operation, capacity and efficiency, and verification of manufacturer's guarantees. Each one contains a check list of items on which agreement should be reached before starting tests, specifies the instruments and testing apparatus needed, lists precautions, gives instructions for computing and tabulating results and shows how to correct results for deviations from specified test conditions.

The Performance Test Codes Committee is following a policy of submitting the PTC Documents to ANSI for approval as American National Standards. The documents that have been approved bear the ANSI/ASME designation. This PTC/ANSI relationship will reduce duplication of effort and promote the consensus standards concept.

Periodicals

MECHANICAL ENGINEERING—The official voice of the American Society of Mechanical Engineers, this once-a-month publication provides a lively forum for current news and issues of a practical, economic and political nature.

To assist the mechanical engineer in keeping abreast of new developments in his respective area of interest as well as allied fields, each issue includes the following features:

Editorials • Opinion • Comment • Technical Developments • News of the Profession • Engineering Education • Meetings & Conferences • Information Services • News of Members • ASME Codes & Standards and Reader's Service including Employment Opportunities.

Annual subscription	$22.00	Members	$8.00
Two year subscription	$42.00	Members	$16.00
Three year subscription	$62.00	Members	$24.00

Add $5.00 for each subscription mailed outside the U.S. and Canada

APPLIED MECHANICS REVIEWS (published monthly)—Annual subscription price is $275.00 to nonmembers and $250.00 to ASME members. Add $30.00 for each subscription mailed outside the U.S. and Canada. New subscriptions and subscriptions mailed outside the U.S. and Canada must be prepaid.

TRANSACTIONS OF THE ASME
Journal of Applied Mechanics
Journal of Biomechanical Engineering
Journal of Dynamic Systems, Measurement and Control
Journal of Energy Resources Technology
Journal of Engineering for Industry
Journal of Engineering for Power
Journal of Engineering Materials and Technology
Journal of Fluids Engineering
Journal of Heat Transfer
Journal of Lubrication Technology
Journal of Mechanical Design
Journal of Pressure Vessel Technology
Journal of Solar Energy Engineering

Annual subscription rates to nonmembers: one journal $60.00, two journal, $116.00, three journals $174.00, four journals $232.00, five journals $290.00, six journals $336.00, seven journals $392.00, eight journals $448.00, nine journals $504.00, ten journals $540.00, eleven journals $594.00 twelve journals $648.00, thirteen journals $702.00. ASME members: 50% discount. Add $5.00 for each journal mailed outside the U.S. and Canada. New subscriptions and subscriptions mailed outside the U.S. and Canada must be prepaid.

ASME MISCELLANEOUS PAPERS

The papers in this list were presented at ASME during 1979 but were not published in the *Transactions* of the ASME or in full in MECHANICAL ENGINEERING. They can be consulted in the Engineering Societies Library where photostatic copies may be obtained and quotations will be given upon request.
